- ☐ **AVOID** 6 a.m.-10 a.m., 2 p.m.-12 a.m.

Quick action checklist

- ☐ Central A/C: Pre-cool the house 10 a.m.-2 p.m. while super off-peak is active. Drop setpoint 3-4°F below normal.
- ☐ Dishwasher: Delay-start at bedtime so the heated-dry cycle lands 1-5 a.m. Or run during midday super off-peak.
- ☐ Clothes Dryer: Weekday 10 a.m.-2 p.m. Super off-peak rate AND you're awake to monitor lint/fire risk.
- ☐ EV Charger (Level 2): Set the CAR (not a wall timer) to start at midnight, stop at 6 a.m. Full overnight super off-peak.
- ☐ Pool Pump: Two blocks: 1-5 a.m. and 10 a.m.-2 p.m. = 8 hours, 100% super off-peak. Set on the pump timer.
- ☐ Confirm you are on TOU-DR1 (or evaluate EV-TOU-5 if you have an EV) at sdge.com.
- ☐ Review next bill - check the "Time of Use" usage chart to verify the shift worked.
